10th International Conference
“ *Models in Developing Mathematics Education* ”
September 11 – 17, 2009
Dresden, Saxony, Germany

Dresden 2009 will be our tenth international conference, following successful conferences in Egypt, Jordan, Poland, Australia, Sicily-Italy, Czech Republic, Poland, Malaysia and the USA. Our conferences are normally attended by many of the "movers and shakers" in education world-wide, 31 countries were represented in our last conference for example. We are especially pleased and excited that in 2009 we will be coming for the first time to Germany and to the city of Dresden.

Our conference will have the patronage of the Saxony Ministry of Education and the full cooperation and support of the **University of Applied Sciences Dresden**. Many of the participants will be accommodated in the splendid **Mercure Hotel** nearby to the University. The Chairman of the Local Organising Committee is **Professor Dr.rer.nat.habil. Ludwig Paditz** of the Univ. of Appl. Sci. Dresden. With his strong support we are confident that our conference will attract many teachers and mathematics educators to Dresden from all over the world, and also from Germany (as we are organising a special parallel German-language weekend programme). We are already preparing a detailed academic and social programme to welcome them all.

All of our previous conferences have benefited greatly from the generous sponsorship of companies and firms. We believe it will be mutually valuable and useful for them to support and sponsor our conference and we look forward to hearing from you regarding this.

We are pleased to offer some or all of the following in return for your sponsorship:

- put your flyer and materials in each participant's bag
- have your name on every participant's badge
- have a permanent display of your materials and products throughout the conference
- have your name in all conference literature
- have your company mentioned in public at all of the plenary sessions
- have a poster or posters with the your name and logo displayed during all the sessions
- have selected individual participants sponsored as "your scholars"

We are an entirely educational project so your sponsorship will be used to help key participants attend the meeting. Please let us know which of the above you are interested in and we can negotiate an overall sponsorship fee.

We look forward to hearing from you and to working with you in Dresden 2009!

Thanks and Best wishes
Alan
